## How to Connect Your Social Media Accounts

In this video we will discuss how to connect social media to your High Ground account.

Being able to reach your contacts may mean reaching out via social media. If you have a Twitter, Facebook, or LinkedIn account and would like to publish your message on your social media page, we can do that.

To connect your Social Media accounts simply hover over "Account" and select "Account Details". At the bottom left you'll see a button that says "edit account details". When you click this you'll have the ability to add your social media accounts with ease.

Simply click the corresponding sign in button and follow the steps to authenticate your social media account. In this example we'll be using Facebook.

Once your social media accounts have been added to the system you can simply include them in a future text or voice alert by selecting them at the end of the alert screen - right after you finished creating your message. Once you have authenticated your accounts, click the update button at the bottom of the screen to save your work.

Thanks for watching! If you have more questions please feel free to contact our Customer Success Team at [support@highgroundsolutions.com](mailto:support@highgroundsolutions.com).
